PASSWORD: C23661

Source Name: LOST CREEK

Tributary To: HAT CREEK

County: Shasta

Diversion Within: SW1/4 of SW1/4 Section 34, T34N, R05E, MB&M

Year of First Use: 1884

Parcel Number:

A. Water is used under: Riparian claim \_\_\_\_\_ Pre 1914 right X Other (explain): \_\_\_\_\_

B. Year of first use (Please provide if missing above) \_\_\_\_\_

C. Amount of Use - Enter the amount (or the approximate amount) of water used each month.

Amounts below are:													Total Annual
Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	
1999	75	75	75	75	75	75	75	75	75	75	75	75	900 CFS
2000	75	75	75	75	75	75	75	75	75	75	75	75	900 CFS
2001	75	75	75	75	75	75	75	75	75	75	75	75	900 CFS

D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation X 600 acres; Stockwatering X; Domestic \_\_\_\_\_;

Other (specify) See continuation

E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.) none

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES \_\_\_ NO X

Describe any water conservation efforts you have initiated: \_\_\_\_\_

b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)

Reductions in consumptive use:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES \_\_\_ NO \_\_\_

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

ITEM CONTINUATION  
We use this water through 3 Hydro Elec. Plants; 4 small lakes for wild life & recreation; used to produce 700,000 lbs of Rainbow Trout

If there is insufficient space for your answers, please use the space provided below.  
DATE: 6-24-2002 at Fort Creek, California  
SIGNATURE: Mark N. Bidwell  
PRINTED NAME: Mark N. Bidwell  
COMPANY NAME: Bidwell Ranch Inc  
(first name) (middle init.) (last name)

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

2. Water quality and wastewater reclamation
- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ☒ NO ☐
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:
3. Conjunctive use of surface water and groundwater
- a. Are you now using groundwater in lieu of surface water? YES ☒ NO ☐
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:
- I have data to support the above surface water use reductions due to conjunctive use efforts. YES ☐ NO ☐ (aff/mg) yr
- I have data to support the above surface water use reductions due to wastewater reclamation. YES ☐ NO ☐ (aff/mg) yr
- I have data to support the above surface water use reductions due to conjunctive use efforts. YES ☐ NO ☐ (aff/mg) yr

There are two principal types of surface water rights in California. They are riparian and appropriative rights. A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

13 of Water Rights for the Lost )  
14 Creek II Hydroelectric Project )  
15 and the Lost Creek I )  
16 Hydroelectric Project. )  
17 \_\_\_\_\_)

18 I, Floyd Bidwell, declare:

19 1. I am the owner of "Bidwell Ranch", in eastern Shasta  
20 County, California. Bidwell Ranch is approximately 15 miles  
21 southeast of Burney and 15 miles south of Fall River Mills.  
22 Bidwell Ranch is also identified in Exhibits A, B, and C,  
23 attached hereto.

24 2. I personally have resided on the Bidwell Ranch since  
25 1924. My family has resided on Bidwell Ranch since 1900, when  
26 the property was purchased from the original patentee.

27 3. I am also the owner of the parcel in Shasta County  
28 containing the diversion works for Lost Creek. That property  
(hereinafter "Bidwell Diversion Parcel") is described in  
Exhibit D, attached hereto. The Bidwell Diversion Parcel also

chain 27.76?

1 is depicted on Exhibits A, B, and C. I have owned the Bidwell  
2 Diversion Parcel since 1953.

3 4. I have knowledge of the geography of the Lost Creek  
4 area and the history of diversion of the Lost Creek. To the  
5 extent that the description of historical events is not based  
6 upon my personal knowledge, it is based upon information derived  
7 from public records and/or my predecessor(s) in ownership of the  
8 Bidwell Diversion Parcel and Bidwell Ranch.

9 5. Lost Creek is fed from springs located in Lost Creek  
10 Canyon. Prior to the diversion of the Creek at a point on the  
11 Bidwell Diversion Parcel, all water was lost to percolation  
12 shortly after the stream exited Lost Creek Canyon, as depicted  
13 in Exhibit A ("old percolation area").

14 6. Approximately in 1880, a predecessor in ownership of  
15 Bidwell Ranch diverted the flow of Lost Creek into a ditch, now  
16 known as Bidwell Ditch, also known as Lost Creek Ditch. The  
17 ditch carried the water exclusively to the properties that now  
18 constitute the Bidwell Ranch property. The point of diversion,  
19 still maintained today, is on the Bidwell Diversion Parcel. The  
20 point of diversion for Bidwell Ditch, and the Ditch itself, are  
21 depicted on Exhibits A, B, and C.

22 7. In 1910 and again in 1912, my grandmother, Mary A.  
23 Bidwell, great uncle, J.H. Bidwell, and their neighbor, C.J.  
24 Long (1912 only) recorded Notices of Appropriation of Water with  
25 the Shasta County Recorder. A copy of the 1910 Notice is  
26 attached as Exhibit E. A copy of the 1912 Notice is attached as  
27 Exhibit F. The 1910 notice claims 2000 inches of water out of  
28 Lost Creek; the 1912 notice claims 3000 inches. Both notices

1 describe the works then and still used to divert the entire flow  
2 of Lost Creek: a wooden flume and a 20' x 4' earthen ditch. The  
3 ditch runs for approximately six miles from the northwest corner  
4 of the Bidwell Parcel to the Bidwell Ranch. The diversion works  
5 have been maintained by my family and me in their original  
6 configuration. With two minor exceptions, the entire flow of  
7 Lost Creek is diverted by the Bidwell Ditch. The first  
8 exception is that in times of high local runoff, the flow of  
9 Lost Creek may exceed the capacity (approximately 80 cfs) of  
10 Bidwell Ditch. Second, a small amount of water (approximately  
11 1 cfs) is diverted from Lost Creek, upstream of the Bidwell  
12 Ditch Diversion Parcel, for use on the Wilcox property.

13 8. I own a complete interest in the Bidwell Ditch. The  
14 interests were obtained in the following manner. Mary A.  
15 Bidwell left her estate to my father, Charles M. Bidwell.  
16 Charles M. Bidwell purchased the estate of J.H. Bidwell. I  
17 acquired the C.J. Long Ranch, and inherited all of Charles M.  
18 Bidwell's property, thereby uniting all interests in Lost Creek  
19 Ditch.

20 9. The sole sources of water for Lost Creek, discounting  
21 minimal rainfall drainage, are the springs of Lost Creek Canyon.  
22 All water diverted by Bidwell Ditch is used on the property now  
23 constituting the Bidwell Ranch irrigation and domestic use  
24 runoff is diffuse surface waters tributary to no body of water.  
25 There are no other consumptive users of Lost Creek, either  
26 upstream or downstream.

27 10. Since the initial diversion, the waters of Lost Creek  
28 have been continuously used for irrigation, domestic, power and

1 stock watering purposes. The water is also used to generate  
2 power for irrigation pumping and domestic pressure. Other than  
3 stock watering ponds, no water is stored. I have filed a  
4 Statement of Diversion and Use (No. 1613) with the State Water  
5 Resources Control Board pursuant to such use patterns. A true  
6 and correct copy of the Statement of Diversion and use is  
7 attached as Exhibit G. There is in operation one hydroelectric  
8 facility on Bidwell Ditch. It (the Bidwell Ditch Project) is  
9 operated by Mega Renewables and is located downstream of the  
10 Lost Creek I and Lost Creek II Projects.

11 11. I have participated in the Lost Creek II Hydroelectric  
12 Project. In 1983, the Division of Water Rights of the State  
13 Water Resources Control Board issued a letter indicating that  
14 the Division believes that water rights exist for the Lost  
15 Creek II Project. A copy of the letter is attached hereto as  
16 Exhibit H. At the time of issuance of that letter, the Lost  
17 Creek II Project configuration was identical to that for which  
18 the Federal Energy Regulatory Commission ("FERC") has issued a  
19 license. On or about May 29, 1987, I obtained a license from  
20 FERC (No. 5130) for the construction, operation, and maintenance  
21 of the Lost Creek II Project. A copy of the FERC order issuing  
22 license is attached as Exhibit I. On or about September 27,  
23 1987, the United States Forest Service issued a Special Use  
24 Permit to me and Mega Renewables authorizing construction of  
25 part of the Lost Creek II Project on federal lands. A copy of  
26 the Special Use Permit is attached as Exhibit J. On  
27 December 14, 1984, I entered into a Standard Offer No. 4 Power  
28 Purchase Contract with PG&E. On March 31, 1988, I assigned my

1 interest in the contract to Mega. On March 31, 1988 I sold,  
2 transferred and assigned all rights, title, and interest in the  
3 Lost Creek II Project to Mega. A true and correct copy of the  
4 "Purchase and Royalty Agreement" effecting that transfer is  
5 attached as Exhibit K. Interests transferred include: a) all  
6 interest in the FERC license; b) the Special Use Permit issued  
7 by the Forest Service for the Project; c) the necessary water  
8 rights; and d) the Power Purchase Agreement. I am aware that  
9 Mega assigned its interest in the Purchase and Royalty Agreement  
10 to Highland Hydro Construction, and I consented to that  
11 assignment in writing, by an instrument dated February 2, 1989.  
12 I also granted to Mega an easement authorizing construction and  
13 operation of the Lost Creek II Project on the Bidwell Diversion  
14 Parcel. A true and correct copy of that document is attached as  
15 Exhibit L. I am aware that Mega's interest in the easement has  
16 been assigned to Highland and I consented to that assignment by  
17 an instrument dated February 9, 1989.

18 12. I have also participated in the Lost Creek II  
19 Hydroelectric Project. The intake for that project will be  
20 located on USFS land, upstream of the historic Bidwell Ditch  
21 diversion point, and the powerhouse will be located on the  
22 Bidwell Diversion Parcel, just above the point of diversion for  
23 Bidwell Ditch.

24 In 1981 and again in 1982, my agents received letters from  
25 the State Water Resources Control Board indicating that water  
26 rights exist for the Lost Creek I Project. Copies of those  
27 letters are attached as Exhibits M and N. At the time inquiry  
28 was made of the State Board, the Project configuration was

1 identical to that currently planned and for which FERC has  
2 issued a license.

3 On May 18, 1988, FERC issued a license to me to construct  
4 and operate the Lost Creek I Project (No. 3863). On March 23,  
5 1989, Highland and I made application to FERC for transfer of  
6 the license to Highland. On April 26, 1989, the USFS issued a  
7 special use permit to Highland and me for the construction and  
8 operation, and maintenance of the portions of the Lost Creek I  
9 Project to be located on USFS property.

10 On September 14, 1987, I entered into an agreement with  
11 Mega with respect to the Lost Creek I Project, by which I  
12 granted to Mega the option to purchase the Lost Creek I Project,  
13 including water rights for the Project. A copy of the option is  
14 attached as Exhibit O. I am aware that Mega assigned the option  
15 to Owl Constructors and that Owl assigned the option to  
16 Highland, and I have consented to these assignments.

17 13. I am unaware of any ongoing litigation concerning the  
18 property or water rights identified herein. To the best of my  
19 knowledge, no deed in the chain of title of either the Bidwell  
20 Ranch or the Bidwell Parcel makes express reference to water  
21 rights.

22 I declare under penalty of perjury that the foregoing is  
23 true and correct.

24 Executed on June 12, 1989, at Redding, California.

8 BEFORE THE STATE WATER RESOURCES CONTROL BOARD  
9

10 In Re the Application of	)	THIRD DECLARATION OF
Highland Hydro Construction,	)	FLOYD BIDWELL
Inc. for Board Certification	)	
11 of Water Rights for the Lost	)	
Creek II Hydroelectric Project	)	
12 and the Lost Creek I	)	
Hydroelectric Project.	)	
13	)	

14 1. I made a declaration dated June 12, 1989, and a  
15 supplemental declaration dated August 25, 1989, which were given to  
16 the State Water Resources Control Board. I am making this third  
17 declaration to describe in more detail the history of the Bidwell  
18 Ditch, the work that was done on the ditch over the years, and the  
19 use we have made of the water.

20 2. Of course, I wasn't there, but I know from my family  
21 and from an old hand named Jim Bennett (who worked for me and must  
22 have been about 85 years old by the Second World War) that the ditch  
23 was built from 1880 to 1883. It took three years for water to get  
24 all the way down to the ranches. The ditch runs for about six miles  
25 from the diversion to the ranch.

26 3. The ditch was flume in some places, rock ditch in  
27 most places. The ditch originally started where we blasted out a  
28 rock channel and ran a flume right from the channel. The wood flume

1 fit into that rock channel. In the beginning, the only equipment we  
2 had were hand tools, horses, and wagons. In places the ditch was  
3 100 or more feet wide through the lava rock. Down near the bottom,  
4 for the mile up from the ranch, we ran the ditch on top of a wide  
5 rock base. That part of the ditch was at least 12 feet wide and two  
6 feet deep. Horses and wagons hauled dirt to seal that last mile of  
7 ditch as much as possible.

8           4. Before World War II, the irrigation on the three  
9 original ranches (which I own now and operate as one) only amounted  
10 to around 350 acres. That's all the land that we had water for.  
11 The whole creek was diverted at the head of the ditch, but a lot of  
12 the water wasn't making it down to the ranch. There never used to  
13 be enough water from the ditch to irrigate any one field of alfalfa  
14 again in less than three weeks after the first irrigation. That's  
15 not enough to keep alfalfa going.

16           At the time of World War II, we cleared a lot of land.  
17 Since around 1940, we've had about 1,000 acres we can irrigate.  
18 But, after we cleared more land, of course, we didn't have enough  
19 water coming down the ditch. We finally got bulldozers in about  
20 1948, and we used them to get right in the ditch channel and clear  
21 it out. We had never had any way to do that kind of work before, no  
22 physical way to clear the huge lava rocks and willows. We spent a  
23 whole winter clearing the ditch with those bulldozers in order to  
24 get more water to irrigate our 1,000 acres. With the bulldozers, we  
25 could decrease seepage by making the ditch narrower through the lava  
26 rocks.

27           5. We've been irrigating 1,000 acres since the late  
28 1940's. I have been operating the ranch myself since the early

1 1950's, but I've worked on the ranch all my life. I know we  
2 reported that we irrigated about 500 acres in 1966, but I know that  
3 that acreage number was wrong. My mother, Birdie Bidwell, used to  
4 file those papers, and she was guessing. She didn't work the land  
5 herself. I wonder if the fellows at the Farm Bureau meetings didn't  
6 confuse her about what she was supposed to file. Those reports are  
7 just wrong if they say we were irrigating less than 1,000 acres  
8 since the end of the 1940's.

9           6. We lost at least 50 percent of the water coming down  
10 the ditch, even after all the work we did. The old Watermaster,  
11 Vicroy, and I went out to try to figure out how much we were losing  
12 and if there was some one place where we were losing a lot of water,  
13 so we could fix the problem. We still were not getting as much  
14 water as we needed. As a favor to me, he went out with me and went  
15 along the whole ditch. We measured flows at the head of the ditch,  
16 which was all the flow of Lost Creek, and at the ranch. Half the  
17 water was being lost, but there was no one place where a whole lot  
18 of water was being lost. It was just gradually being lost the whole  
19 length of the ditch.

20           7. We have always had to repair the ditch and its  
21 flumes. Even though the flow of the spring, which is the source of  
22 Lost Creek, is fairly steady, we do get flood waters. Butte Lake,  
23 for instance, can overflow, and if the rim flats above us have had  
24 snow followed by warm rains, lots of water comes down from the rim  
25 above the spring. The ditches overtop sometimes, and have to be  
26 built up again. Spring flow also varies somewhat after drought  
27 years, when we notice we get even less water than usual.

28

1                   8.    We have had to repair and replace flumes, as well.  
2 I have seen pictures taken in 1956 by Vic Scammon, who was working  
3 for the State, and those pictures show an old and new flume section  
4 that crossed a stretch of sink holes in the lava boulders. The old  
5 wood flume in the picture was repaired over the years, but was  
6 basically the flume that was there since the 1880's. It carried the  
7 full flow of water that make it to that point. It was square  
8 bottomed, about four feet wide and two feet deep. Although the  
9 picture doesn't show it, my father lined it with sheet metal to stop  
10 leaks. We built the flume shown in the picture in about 1945. I  
11 went down to Berkeley to Armco Steel and bought the steel half that  
12 the picture shows. It was round, about four feet wide at the top  
13 and 24 inches deep. I don't know why I bought such a big half, but  
14 it was what I could get because of the war. We built that new flume  
15 so it wasn't quite as steep as the old one, but it carried the same  
16 amount of water as the old flume did.

17                   9.    Both of those flumes are gone now. A huge fire  
18 burned through that whole area on Labor Day 1987, and badly damaged  
19 the flume. When last winter's floods came down, it all washed out.  
20 It was a desperate situation, especially for the fish, and we had  
21 emergency crews up here who built a rock, gunnited ditch to replace  
22 the flume. That new ditch section was put in fast enough that we  
23 think most of the fish were saved.

24                   10. We've always had problems with freezing in the ditch  
25 and laterals in the winter. From where the main Bidwell Ditch  
26 reaches the ranch, it branches into three ditches (we use more, four  
27 or five, in the summer). We've used all the water that we could  
28 get. We've used the water to irrigate, for livestock, for house

1 use, and for fish and birds in our pond. You need a fast stream of  
2 water through a ditch to keep it from freezing. Ditches freeze from  
3 the bottom up, and once a ditch freezes up, you can't open it up  
4 again. In winter, less than half as much water reaches the ranch as  
5 reaches it in summer. This additional loss comes from the freezing.  
6 If the main ditch weren't so steep and the water flow so fast in the  
7 upper section, probably no water would reach us in the winter.  
8 After the water reaches the ranch, it is distributed via lateral  
9 ditches. The lateral ditches freeze up regularly. So far as I  
10 know, though, the main ditch has never frozen completely, although  
11 it has come close plenty of times. It does freeze over the top in  
12 the lower reaches at the ranch.

13           11. There have been changes in how our water is being  
14 used in the last three years. For one, the water is being used to  
15 generate more power. I have also leased some land to Mt. Lassen  
16 Trout Farm, and it takes the water when it comes out of the Bidwell  
17 Project powerhouse, before I use it for all the same uses I've had  
18 before. One other change is that I don't use what we call the  
19 Lamarr Ranch meadows any more. We used to keep about 75 head of  
20 cattle on about 15 or 20 acres there for two to three months every  
21 summer. We'd irrigate the meadows by removing the board from across  
22 an old 8-inch pipe that took off from the ditch just below where the  
23 Lost Creek II Power Project intake is now. We put that 8-inch  
24 cement pipe in the 1950's; before that, Lamarr, an old Indian who  
25 had a patent to the land from BIA, used to irrigate it using a rock  
26 canal system. I'd say it took 2 or 3 cfs from the main ditch to  
27 irrigate the Lamarr meadows because of additional ditch losses en  
28 route. There's lots of lava rock up there. The 1987 fire burned

1 big patches of peat, so those meadows are gone now. I have filed  
2 with the State Department of Forestry for re-forestation help and  
3 will be planting pines where the meadow burned out.

4 12. The FERC license for the Lost Creek II project has  
5 been transferred to Highland Hydro. Attached to this declaration as  
6 Exhibit "A" is a true and correct copy of the order approving the  
7 license transfer.

8 13. I also entered into an agreement with Highland Hydro  
9 which gave them an easement on my property. A true and correct copy  
10 of this document is attached hereto as Exhibit "B".

11 I declare under penalty of perjury that the foregoing is  
12 true and correct.

13 Executed this 25 day of October, 1989, at

14 Hot Creek, California.

27 FEB 1989

UNITED STATES OF AMERICA  
FEDERAL ENERGY REGULATORY COMMISSION

Mega Renewables  
Highland Hydro Construction, Inc.

Project No. 5130-009  
California

ORDER APPROVING TRANSFER OF LICENSE

(Issued May 22, 1989)

Mega Renewables seeks Commission approval to transfer its license for the Lost Creek No. 2 Project to Highland Hydro Construction, Inc. The project occupies lands within the Lassen National Forest on Lost Creek, in Shasta County, California.

Mega Renewables has fully complied with the terms of the license and agrees to pay annual charges that have accrued to the date of the transfer. Highland Hydro Construction, Inc. is qualified to hold the license and operate the property under license and agrees to be bound by the license as if it were the original licensee.

No motions to intervene, comments, or protests were filed in response to the public notice of the application to transfer the license. Transfer of the license for this project is consistent with the Commission's regulations and is in the public interest.

The Director orders:

- (A) Transfer of the license for this project is approved.
- (B) Approval of the transfer is contingent upon transfer of title of the properties under license and delivery of all license instruments to Highland Hydro Construction, Inc., which shall be subject to all terms and conditions of the license as though it were the original licensee. Highland Hydro Construction, Inc. shall submit certified copies of all instruments of conveyance within 60 days from the date of this order.
- (C) This order is issued under authority delegated to the Director and is final unless appealed to the Commission within 30 days from the date of this order. Highland Hydro Construction, Inc. shall acknowledge acceptance of this order and its terms and conditions by signing and returning the attached acceptance sheet within 60 days from the date of this order.

ORDER APPROVING TRANSFER OF LICENSE

(Issued June 12, 1989)

Floyd M. Bidwell seeks Commission approval to transfer his license for the Lost Creek No. 1 Project to Highland Hydro Construction, Inc. The project is located on Lost Creek in Shasta County, California. The purpose of the transfer is to facilitate financing and construction of the project.

Mr. Bidwell has fully complied with the terms of the license and agrees to pay annual charges that have accrued to the date of the transfer. Highland Hydro Construction, Inc. is qualified to hold the license and operate the property under license and agrees to accept all of the terms and conditions of the license and to be bound by the license as if it were the original licensee.

No comments, protests, or motions to intervene were filed in response to the public notice of the application to transfer the license. Transfer of the license for this project is consistent with the Commission's regulations and is in the public interest.

The Director orders:

(A) Transfer of the license for this project is approved.

(B) Approval of the transfer is contingent upon transfer of title of the properties under license and delivery of all license instruments to Highland Hydro Construction, Inc., which shall be subject to all terms and conditions of the license as though it were the original licensee. Highland Hydro Construction, Inc. shall submit certified copies of all instruments of conveyance within 60 days from the date of this order.

(C) This order is issued under authority delegated to the Director and is final unless appealed to the Commission within 30 days from the date of this order. Highland Hydro Construction, Inc. shall acknowledge acceptance of this order and its terms and conditions by signing and returning the attached acceptance sheet within 60 days from the date of this order.

GRANT OF EASEMENT

This Grant is made this 4<sup>th</sup> day of August,  
1989, by Floyd Bidwell  
("Grantor"), and HIGHLAND HYDRO CONSTRUCTION, INC.  
("Grantee").

1. Grantor does hereby grant to Grantee, in perpetuity, the exclusive rights, privileges and easements for the purpose of constructing, operating and maintaining a hydroelectric power project known as the Lost Creek I Hydropower FERC No. 3863 Project (including, but not limited to, the construction and maintenance of power transmission lines, penstock, access roads, fences, structures, fixtures and any other incidental or necessary facilities), (hereinafter collectively referred to as the "Project") over, across and upon those certain real properties described in Attachment A (the "Properties"), and by reference made a part hereof.

2. Grantee shall only disturb portions of the Properties as are reasonably necessary for the construction, operation or maintenance of the Project. All merchantable timber logged by Grantee shall remain the property of the

EXHIBIT

B

Grantor. Upon completion of construction, all disturbed areas other than those areas or roads necessary for the maintenance or operation of the Project and shall be revegetated by Grantee to meet the standards of the County of Shasta, California, and the State of California Water Quality Control Board to the extent it is economically reasonable for Grantee to do so.

3. Within ninety (90) days of construction completion, Grantee shall cause to be recorded a record of survey and legal description prepared by an independent surveyor defining the Project location, including the minimum right-of-way necessary for operation and maintenance, which shall be deemed the Easement location for purposes of this grant of use.

4. The rights and easements, in addition to the Easement for the Project granted herein with regard to the Properties, shall include non-exclusive rights of way in perpetuity, to agents and employees of the Grantee as necessary for free ingress and egress to and from the Project adjacent to said Properties, over and across roads and pathways as now exist, or by such routes that will cause the least practicable damage and inconvenience to Grantors' lands; provided that the right set forth in this paragraph shall not extend to any portion of the Properties which is isolated from the Project by any public road or highway now

crossing or hereafter crossing said lands; also, provided that if any portion of said Properties is or shall be subdivided and publicly dedicated roads on such subdivided portion shall extend to the Project easement, the rights set forth in this paragraph on said subdivided portion shall be confined to such dedicated roads and highways, but shall not restrict Grantees' right of access in cases of emergency. Grantee shall have the right to construct and maintain, at its own expense, additional roads outside the Project easement, subject to Grantor's approval of location, which approval shall not be unreasonably withheld. Grantor reserves the right of reasonable use of any roads constructed or maintained on the Properties; provided that such use shall not interfere with the construction, operation or maintenance of the Project. In cases of emergency, Grantee shall have the right, as necessary, to cross and recross the Properties for purposes of access to that portion of the Project where the emergency exists; provided that Grantee shall not unnecessarily damage the lands of Grantor; and further provided that Grantee shall restore the property to as near its pre-emergency condition as is economically practicable.

5. Grantor agrees to pay all applicable property taxes assessed against the Properties, except that the Grantee shall pay all possessory interest taxes and

assessments due as a result of or charged against the activities of Grantee upon or directly related to said real Properties. Prior to March 1 of each year, Grantee shall request separate assessments by the Shasta County Assessor's Office for the possessory interests of the Grantee in said Properties.

6. This Easement shall be construed as an easement in gross, and may be conveyed, transferred, assigned, hypothecated or devised by Grantee without the prior written consent of the Grantor, their heirs or assigns. Grantee shall have the right to license third parties to enter upon the Properties to construct, improve, maintain and use the Project and the Easement granted herein.

Statement of Water Diversion and Use

A. Name of person diverting water Wife of Charles M. Bidwell deceased Mrs. Birdick Bidwell  
Address RT 2 Box 5471 Caswell Calif. 96016

B. Name of body of water at point of diversion Lost Creek  
Tributary to drains in Rocks  
Situated in W1/4 Sec 1 and 2 T34-4E NDM + Sec 6 and 7 T3P

C. Place of diversion W1/4 Sec 34-4E NDM - Oct 19-1912, H Bidwell Mary A Bidwell  
Hotchkiss Siskiyou County, or locate it on sketch of section grid on reverse side with regard to section, line & prominent local landmarks. Claimant of the S.W. 1/4 of the S.W. 1/4 of Sec 34 T3P 34 N R.

D. Capacity of diversion works is ditch 20 ft by 4 ft deep  
Capacity of storage reservoir \_\_\_\_\_  
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1966 :	<u>Stock water all year irrigation for 6 to 8 months depending on weather conditions</u>												

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as \_\_\_\_\_  
of each crop irrigated, average number of persons served, number of stock watered, etc. near 500 acres  
and 200 cows + calves before sale time

Maximum annual water use in recent years has been all of it through irrigation  
Minimum annual water use in recent years has been \_\_\_\_\_  
Type of diversion facility: gravity ☒, pump \_\_\_\_\_  
Method of measurement: weir \_\_\_\_\_, flume \_\_\_\_\_, electric power meter \_\_\_\_\_, water meter \_\_\_\_\_, estimate \_\_\_\_\_

E. Purpose of use (what water is being used for) irrigation + stock - also was used for domestic for years

F. General description or location of place of use (use sketch of section grid on reverse side if you desire) USFS map - enclosed

G. Year of first use as nearly as known 1884 by Hovey Pickett he made a ditch for 2 miles  
other people filed but never used the water

H. Name of person filing statement Birdick Bidwell  
Position reaching Organization 34th State filing May 25-1910  
Address Caswell P.O. Siskiyou Co. Calif.

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed Dec 4 Signature Birdick Bidwell

The water has been in use for over 50 yrs by the Bidwell family.  
See Instructions on Reverse Side  
It was filed on 5000 inches of water - but I can't find it in the records - it is there as I did find it earlier
